Accenture Holds GLOBE Observer Clouds Competition

In June and July 2020, Accenture held a company-wide initiative, Eco Action 2020, encouraging all Accenture people to make an impact through eco learning and virtual eco volunteering, including through GLOBE Observer.

30 teams of Accenture volunteers from around the world submitted more than 15,200 clouds observations during the challenge.

On July 16, Marile Colon Robles (GLOBE Clouds Lead at LaRC) and Holli Kohl (GLOBE Observer Lead at GSFC) shared with Accenture volunteers how data from their cloud observations will be used.

“It was really great to meet the NASA scientists through this meeting. Really informative session. That we are contributing to NASA through GLOBE Observer is a really great thing.”

“Thanks a lot. One of the best sessions I have attended so far! Feel proud to be a part of it 🥰”

“Thanks Holli and Marile for informative session. Learned a lot!! Thanks again!! Definitely will submit more and more observations.”
